For Immediate Release  
June 27, 2011

## **Water Quality Report Shows La Palma Has Clean Water**

The City of La Palma recently produced its 2011 Drinking Water Quality Report, a comprehensive drinking water resource document that is delivered to all City of La Palma water customers each year. The report provides valuable water quality information and is a requirement of the California Department of Public Health.

Based on the results shown in the report, La Palma's water meets or exceeds all established water quality standards. Public Works Director Jeff Moneda, states, "City staff works diligently 24 hours a day to ensure that La Palma's water stays clean, tastes great, and meets all Federal standards." He also noted that the City has implemented a long-term repair and preventative maintenance plan to ensure the quality of La Palma's water system well into the future.

The Drinking Water Quality Report provides information on regulated and unregulated contaminants. Each potential contaminant is compared with Federal standards. In addition to providing the results of the thousands of water quality tests performed every year, the report helps customers know where their water comes from and how it gets to their homes or businesses.

The 2011 Drinking Water Quality Report is being mailed out to all residents who receive La Palma water and is also available on the City's website at [www.cityoflapalma.org](http://www.cityoflapalma.org). Customers can also call the La Palma Public Works Department at (714) 690-3310 for more information.

### ***About the City of La Palma***

The City of La Palma is a 1.9 square mile general law city in northwest Orange County, consisting of 15,568 residents and 482 commercial and industrial businesses. The City was incorporated in 1955 under the name of Dairyland and has 65 full-time and 35 part-time employees.
